

HarborDev is not your average development shop; we help clients transform their visions into measurable business solutions. As a trusted advisor for our clients, we work together to solve your unique business challenges. Learn about the HarborDev approach and how we craft innovative, responsive, user-driven mobile experiences to meet and surpass your needs. Our services include Mobile Business Strategy, Mobile Design, Native App Development, Mobile Web & Hybrid App Development, Project Management, Content Direction, Web Application Development and more.

Our team spans a range of disciplines, from design and development to marketing and management, we cover every aspect of your mobile needs. Our team preexists the mobile market; we grew with this industry, and our backgrounds span a wide array of experiences that give our designers and developers a competitive edge. We are relentless in our search for the freshest mobile trends. We want everything we build to be relevant, so we always seek inspiration from industry innovations. With our dedicated project management team, we make ourselves available to you from planning to execution and beyond, ensuring that you are personally involved in every step of the process.

We have in-house specialists on a variety of platforms, meaning we can take a single concept and engineer software to launch on multiple devices. User experience is important. We understand that loyalty is earned by apps that are elegant, that run smoothly and engage their users. We won't go to market with anything less.
